Nimbus Ridge Software

Internal Knowledge Base (Confluence export)

Sample data. Nimbus Ridge Software Pvt Ltd is a **fictional company** created for practising RAG (retrieval-augmented generation) and LLM testing. All names, numbers, dates, prices and incidents are invented. Any resemblance to a real company is a coincidence.

About Nimbus Ridge Software

Page ID: 10001 **Owner:** Divya Menon **Last updated:** 5 January 2026 **Status:** Current

Labels: company, about, overview

Who we are

Nimbus Ridge Software Pvt Ltd was founded in 2016 and is headquartered in Chennai, on Old Mahabalipuram Road (OMR). We build software for small and mid-sized businesses. We have additional offices in Bengaluru and Pune. As of 1 January 2026 the company has 240 employees and serves over 1,850 business customers in 14 countries.

Mission

Our mission is to make everyday business software simple, reliable and affordable for growing teams.

Leadership

Role	Name
Chief Executive Officer (CEO)	Meera Raghavan
Chief Technology Officer (CTO)	Arjun Venkatesh
Head of Support	Kavya Nair
Head of QA	Sanjay Iyer
Head of People	Divya Menon

Our values

- **Customer first:** we start every decision from what the customer needs.
- **Own the outcome:** whoever finds a problem stays with it until it is solved.
- **Simple over clever:** we prefer the plain solution that anyone can maintain.
- **Write it down:** decisions, processes and incidents are documented in this knowledge base.

Our products

We have three products: **OrbitDesk** (customer support helpdesk), **LedgerLite** (invoicing and GST billing) and **PulseBoard** (analytics dashboards). See the page *Products and Pricing* for details.

Products and Pricing

Page ID: 10002 **Owner:** Meera Raghavan **Last updated:** 20 January 2026 **Status:** Current

Labels: products, pricing, plans

OrbitDesk (customer support helpdesk)

Plan	Price	Main features
Starter	INR 999 per agent per month (up to 5 agents)	Email tickets, one mailbox, basic reports
Growth	INR 2,499 per agent per month	Everything in Starter plus automation rules, SLA timers, in-app chat and the mobile app
Enterprise	Custom pricing, set by contract	Everything in Growth plus SSO (SAML), audit logs, phone support and a dedicated support manager

LedgerLite (invoicing and GST billing)

LedgerLite costs a flat INR 499 per month per business. It includes GST invoices, e-invoice QR codes, payment reminders and bulk CSV import of customers and items.

PulseBoard (analytics dashboards)

PulseBoard costs INR 3,999 per month and includes up to 10 dashboards. Each extra dashboard costs INR 250 per month. Reports can be exported to CSV and PDF.

Uptime commitment

The monthly uptime target is 99.9 percent for the Growth and Enterprise plans of OrbitDesk. The Starter plan is best effort with no uptime guarantee. If an outage breaks the commitment, affected customers receive a service credit as described in the postmortem for that outage.

Note: All prices are in Indian rupees (INR) and exclude GST, which is added at 18 percent.

Support Policy and SLAs

Page ID: 10003 **Owner:** Kavya Nair **Last updated:** 18 February 2026 **Status:** Current

Labels: support, sla, escalation

Support hours and channels

- **Standard support hours:** Monday to Saturday, 9:00 AM to 7:00 PM IST.
- **P1 support for Enterprise customers:** 24 hours a day, 7 days a week.
- **Email:** support@nimbusridge.example (all plans).
- **In-app chat:** Growth and Enterprise plans only.
- **Phone:** Enterprise plan only, on +91-44-5550-0100.

Response and resolution targets

Priority	Meaning	First response	Target resolution
P1 Critical	Service down or data loss for many customers	30 minutes	4 hours
P2 High	Major feature broken, no easy workaround	2 hours	1 business day
P3 Medium	Feature problem with a workaround	8 business hours	5 business days
P4 Low	Cosmetic issue or question	2 business days	Next planned release

Escalation path

If a ticket has no response within its target, escalate in this order: Level 1 support agent, Level 2 support engineer, Engineering manager, Head of Support (Kavya Nair), then the CTO (Arjun Venkatesh). For P1 issues, the on-call engineer is paged straight away and an incident is declared (see *Incident Management Process*).

Refund and Cancellation Policy (current, v3.0)

Page ID: 10004 **Owner:** Kavya Nair **Last updated:** 2 January 2026 **Status:** Current (v3.0, effective 1 January 2026)

Labels: refund, cancellation, billing

This is the **current** policy. It replaced version 2.1 on 1 January 2026.

Monthly plans

Customers can cancel a monthly plan at any time. There is no refund for the current billing month, and access continues until that month ends.

Annual plans

Customers get a full refund if they cancel within 14 days of purchase or renewal. After 14 days there is no refund, but access continues until the end of the paid term.

Enterprise plans

Cancellation and refunds for Enterprise customers follow the terms of their individual contract.

How refunds are paid

- Refunds are returned to the original payment method within 7 to 10 business days.
- GST is refunded together with the amount.

What happens to your data

After cancellation, customers can export their data for 30 days. Data is permanently deleted 60 days after cancellation.

SUPERSEDED: Refund Policy v2.1

Page ID: 10005 **Owner:** Kavya Nair **Last updated:** 14 March 2024 **Status:** Superseded on 1 January 2026

Labels: refund, archive, superseded

Warning: this page is outdated. Version 2.1 was replaced by version 3.0 on 1 January 2026. Do not use this page for current customer answers. It is kept for audit history only.

Annual plans (old rule)

Under version 2.1, customers could receive a full refund if they cancelled an annual plan within 30 days of purchase.

Refund timing (old rule)

Under version 2.1, refunds were processed within 14 business days.

Incident Management Process

Page ID: 10006 **Owner:** Arjun Venkatesh **Last updated:** 9 February 2026 **Status:** Current

Labels: incident, process, on-call

Severity levels

Incidents use the same P1 to P4 levels as support tickets. A P1 is a complete outage or data loss affecting many customers. A P2 is a major feature failure with no easy workaround. A P3 is a minor problem with a workaround. A P4 is cosmetic.

Roles in a P1 or P2 incident

Role	Responsibility
Incident Commander (IC)	Leads the response and makes the decisions
Technical Lead	Investigates the cause and applies the fix
Communications Lead	Updates the status page and customers
Scribe	Records the timeline in the incident channel

Steps

- Detect: an alert, a customer ticket or an engineer notices a problem.
- Declare: the first responder declares the incident and a Slack channel named #inc-YYYYMMDD is created.
- Triage: set the priority and name an Incident Commander.
- Mitigate: stop the customer impact first, then find the root cause.
- Communicate: update the status page every 30 minutes for a P1 and every 2 hours for a P2.
- Resolve: confirm that service is fully restored.
- Postmortem: a blameless postmortem is published within 5 business days.

Known Issues Register

Page ID: 10007 **Owner:** Sanjay Iyer **Last updated:** 20 April 2026 **Status:** Current

Labels: bugs, known-issues, jira

The table lists open, in-progress and recently resolved issues across all products.

ID	Product	Issue	Priority	Status	Workaround or fix
BUG-2041	OrbitDesk	Email attachments larger than 20 MB fail to sync to the ticket.	P2	Open	Share large attachments as a download link instead.
BUG-2057	OrbitDesk	Duplicate tickets are created when a customer replies from a mobile mail app.	P2	Fixed	Fixed in OrbitDesk 4.8.2, released 10 February 2026.
BUG-2063	LedgerLite	GST invoice PDF shows wrong rounding on totals when a discount has 3 decimal places.	P2	In Progress	Round the discount to 2 decimal places before saving the invoice.
BUG-2070	PulseBoard	CSV export times out for reports with more than 500,000 rows.	P3	Open	Filter the report to a date range of 90 days or less, then export.
BUG-2078	OrbitDesk	Okta SSO login loops when the browser blocks the session cookie.	P2	Fixed	Fixed in OrbitDesk 4.9.0, released 7 April 2026.
BUG-2085	LedgerLite	Bulk import rejects CSV files saved with a BOM (byte order mark).	P3	Open	Save the CSV as UTF-8 without BOM.

Owners: BUG-2041 is owned by Rohan Das, BUG-2063 by Priya Natarajan and BUG-2070 by Karthik Subramanian. BUG-2085 has not been assigned yet.

Postmortem: INC-1042 API Outage

Page ID: 10008 **Owner:** Arjun Venkatesh **Last updated:** 20 March 2026 **Status:** Current

Labels: postmortem, incident, outage

Summary

On 14 March 2026 the OrbitDesk API and mobile app were unavailable from 04:10 to 06:25 IST, a total of 2 hours 15 minutes. About 410 customers were affected. The web application stayed partly available. The incident was rated P1.

Root cause

The TLS certificate on the API gateway expired at 04:10 IST. The renewal reminder had been sent to the mailbox of an employee who had left the company, so nobody saw it. There was no automated expiry alert and no monitoring of the public endpoints.

Timeline (IST)

Time	Event
04:10	The certificate expires and API calls start failing.
04:25	The first customer ticket arrives. No alert had fired.
04:40	A P1 incident is declared.
05:05	The expired certificate is identified as the cause.
05:50	A new certificate is issued and installed.
06:25	Service is fully restored.

Customer impact and credit

Affected Growth and Enterprise customers receive a 10 percent service credit on their March 2026 invoice.

Corrective actions

Action	Owner	Due	Status
Automate certificate renewal	Rohan Das	15 April 2026	Done
Send expiry alerts at 30, 14 and 7 days to a team distribution list	Rohan Das	31 March 2026	Done
Add synthetic monitoring of public endpoints every minute	Anitha Krishnan	30 May 2026	In progress
Review the ownership of all shared mailboxes	Divya Menon	15 April 2026	Done

Release Notes 2026

Page ID: 10009 **Owner:** Sanjay Iyer **Last updated:** 8 April 2026 **Status:** Current

Labels: release-notes, versions

OrbitDesk 4.9.0 - 7 April 2026

- Fixes the Okta SSO login loop (BUG-2078).
- New: the SLA timer can pause while a ticket is in the status Waiting for customer.
- New: dark mode in the web app.

LedgerLite 2.3.0 - 25 March 2026

- New: e-invoice QR code on GST invoices.
- Known issue: wrong rounding with 3-decimal discounts (BUG-2063), fix in progress.

PulseBoard 1.6.0 - 12 March 2026

- New: heatmap widget for dashboards.

OrbitDesk 4.8.2 - 10 February 2026

- Fixes duplicate tickets created from mobile mail apps (BUG-2057).
- Ticket search is about 20 percent faster.

Security and Data FAQ

Page ID: 10010 **Owner:** Arjun Venkatesh **Last updated:** 3 March 2026 **Status:** Current

Labels: security, faq, compliance

Where is customer data stored?

Customer data is hosted on AWS in the Mumbai region (ap-south-1).

How is data protected?

Data is encrypted at rest with AES-256 and in transit with TLS 1.2 or higher.

Which certifications does the company hold?

Nimbus Ridge Software has been ISO 27001 certified since 2023. A SOC 2 Type II audit is in progress and is expected to complete in Q4 2026. The company does not hold SOC 2 Type II certification yet.

Is multi-factor authentication (MFA) available?

MFA is available on all plans. It is mandatory for Enterprise administrators.

How do I reset my password?

Select Forgot password on the login page. The reset link is valid for 30 minutes.

How are backups handled?

Backups run daily and are kept for 35 days. The recovery time objective is 4 hours.

Employee Handbook (excerpt)

Page ID: 10011 **Owner:** Divya Menon **Last updated:** 12 January 2026 **Status:** Current

Labels: hr, policy, handbook

Working hours

Standard working hours are 9:30 AM to 6:30 PM IST, with flexible core hours from 11:00 AM to 4:00 PM.

Work from home

Employees can work from home up to 2 days per week with their manager's approval.

Leave

- 18 days of paid annual leave per year, and up to 6 unused days can be carried forward.
- 8 days of sick leave per year.
- 12 public holidays per year.

Probation, equipment and learning

- The probation period is 6 months.
- Laptops are refreshed every 3 years.
- Each employee has a learning budget of INR 30,000 per year for courses and certifications.

How to Raise a Support Escalation

Page ID: 10012 **Owner:** Kavya Nair **Last updated:** 25 February 2026 **Status:** Current

Labels: how-to, escalation, jira, slack

When to escalate

Escalate when a ticket is about to miss its response or resolution target, or when a customer reports a possible P1.

Steps

- Create a ticket in the Jira project with the key SUP.
- Post the ticket link in the Slack channel #support-escalations.
- Include the Customer ID, the product and version, the steps to reproduce, and the priority.
- For a possible P1, also page the on-call engineer and follow the Incident Management Process.
- Never put customer passwords or full payment card numbers in a ticket or in Slack.

Ticket template

Field	What to write
Customer ID	The ID shown in the admin console, for example C-10458
Product and version	For example OrbitDesk 4.9.0
Priority	P1, P2, P3 or P4
Steps to reproduce	Numbered steps, starting from login
Expected and actual result	One sentence each
Attachments	Screenshots or logs with personal data removed
